About Me

Full Stack Developer with 4+ years of experience building and scaling production web applications across the stack. Skilled in crafting responsive, component-based frontends with React and Next.js, and in building reliable backend services with Java, Spring Boot, and Node.js. Experienced in REST API design and SQL/PostgreSQL data modeling, with a strong focus on clean, scalable, maintainable code and cross-functional collaboration to deliver measurable business impact.

Education

WOOLF UNIVERSITY

MSC IN COMPUTER SCIENCE

📅 Oct 2024 - Sept 2026

SCALER ACADEMY

WEB DEVELOPMENT BOOTCAMP

📅 Sep 2021 - Jan 2023

AMC ENGINEERING COLLEGE

BE IN COMPUTER SCIENCE

📅 Aug 2017 - Aug 2021

Skills

FRONTEND

React • Next.js • JavaScript • TypeScript • HTML/CSS • Tailwind CSS • Redux

BACKEND

Java • Spring Boot • Node.js • REST APIs • SQL • PostgreSQL • DSA

TOOLS

Git • GitHub • Agile/Jira/Confluence

Awards

TEAM EXCELLENCE AWARD (X2)

LOWE'S INDIA

Recognized for timely feature delivery with comprehensive testing, continuous learning, and decisive leadership in high-risk situations.

INDIVIDUAL SPOT AWARD (X3)

LOWE'S INDIA

Recognized for delivering diverse features on time with strong cross-functional collaboration across development, testing, and support.

Experience

SOFTWARE ENGINEER

LOWE'S INDIA PVT LTD..

📅 Aug 2022 – Present

📍 Bengaluru, Karnataka

NodeStar Application

- Designed and built RESTful services in Java and Spring Boot for shipment tracking and pricing analysis, backed by PostgreSQL, improving on-time delivery rates by 20%
- Built a fully configurable file upload feature end-to-end (React UI with validation, Spring Boot service layer), cutting implementation time for new uploads from 3 days to 1 hour, including testing
- Architected a micro-frontend solution using Webpack Module Federation, consolidating 5 applications into a single host to improve performance and maintainability
- Boosted frontend performance by 30% through React.memo, useCallback, and key refactors, while optimizing backend query and API response times
- Integrated RESTful services with third-party applications using Java and Spring Boot, enabling seamless data exchange across internal and external platforms
- Set up server and API health monitoring, and drove Agile delivery through sprint planning in Jira and documentation in Confluence

WEB DEVELOPMENT INTERN

SOFTNIKA SOLUTIONS PVT LTD..

📅 May 2020 – June 2020

📍 Bengaluru, Karnataka

Gaming Website

- Developed a comprehensive gaming platform using PHP with a SQL-backed relational database, giving gamers centralized access to game information, news update, and purchasing options in one place
- Implemented shopping cart functionality and a dynamic news feed featuring the latest Esports updates and game releases, using structured SQL queries to manage the product catalog and order data
- Engineered user-friendly features enabling gamers to compare prices across titles, browse organized game catalogs, and access both free and premium gaming content
- Built responsive product listing and detail pages with PHP and JavaScript, improving page load consistency across desktop and mobile views
